## **PROJECTS**

# Different Models for Word Spotting (Private Repository) | Python, TensorFlow, PyTorch Present

• In this project, for an industrial project at Electronic Research Institute (ERI), we examine several different models in terms of efficiency, accuracy, ability to implementation, and so on.

#### A ML Framework for Predicting EE in Niosomal Particles Python, TensorFlow Apr. 2022

• In this project, several machine learning models were implemented in the form of a TensorFlow-based framework to predict drug entrapment efficiency (EE) in niosomal particles. Drug entrapment efficiency along with niosomal particle size are the most important features of these drug delivery systems. The results of this project are being submitted in the form of an article.

## Multi-Head ReLU for Implicit Neural Representation Python, TensorFlow

Sep. 2021

• In this project, a novel multi-head multi-layer perceptron (MLP) structure is presented for implicit neural representation (INR).

## Speech Emotion Recognition (My Master's Thesis) Python, TensorFlow, Linux

Jul. 2021

• In this project, we propose an efficient and lightweight fully convolutional neural network (FCNN) for speech emotion recognition in systems with limited hardware resources.

## **Drop-Connect in TensorFlow** Python, TensorFlow

Jul. 2021

• In this project, we implemented drop-connect in form of a Python library.
